Q 1,	A client Mr P has bought March series contract and another client Mr Q has sold March series contract on Nifty futures. This has been done through the sambroker. Will this qualify as a calendar spread?  Yes No	ie
	✓ CORRECT ANSWER	A
	Explanation:	
	Calendar spread position is a combination of two positions in futures on the same underlying - long on one maturity contract and short on a different maturity contract.  The above example is not a Calendar spread because here we have the same expiry ie. March series. Also the spread has to be done by the same client.	
Q 2.	The adjustment factor for a stock which issues a Bonus in the ratio A; B is  (A+B)/B (A+B)xB (A-B)XA	
	✓ CORRECT ANSWER	A
	Explanation:	
	The adjustment factor for :	
	Bonus Ratio – A: B Adjustment factor: (A+B)/B	
	Stock Splits and Consolidations Ratio – A: B Adjustment factor: A/B	
	Right Ratio – A: B and Issue price of rights is S. Adjustment factor: (P-E)/P Where P = Spot price on last cum date E = (P-S) x A / (A+B)	
Q 3.	The spot price of a stock is Rs 200. A trader buys the Rs 195 strike price call option by paying a premium of Rs 10. On expiry the settlement price is Rs 220. What is the net profit for the trader?  Rs 25 Rs 15 Rs 10 NIL	
	✓ CORRECT ANSWER	Δ
	Explanation:	
	The Rs 195 strike price call option settlement price is Rs 220 - So there is profit of Rs 25 ( 220 - 195 )	
	He has paid Rs 10 as premium, so his net profit will be Rs 15 ( 25 - 10 )	
Q 4,	The theoretical future price is considered for is case a futures contract is not traded during the day.  the opening price the daily mark to mark settlement price premium settlement last traded price	
	✓ CORRECT ANSWER	A

Q 5,	Delivery based settlement in single stock futures is provided by  BSE  NSE  OTCEI  Both BSE and NSE	
	✓ CORRECT ANSWER	A
	Explanation:	
	SEBI has allowed physical settlement of futures transactions. OTCEI (Over the Counter Exchange of India) is no longer functional.	
Q 6.	The Final Settlement Price in Options is the Closing price of such underlying security on the last trading day of the options contract - True or False.  True False	
	✓ CORRECT ANSWER	A
	Explanation:

	✓ CORRECT ANSWER	A
	Explanation:	
	STT - Securities Transaction Tax is paid only by the seller in case of derivative contracts.	
Q 12,	The open position of a Trading Member is arrived by  Adding up all his proprietary positions  Adding up all his clients net outstanding positions  Adding both - his proprietary positions and all his clients net outstanding positions  None of the above	
	✓ CORRECT ANSWER Explanation:	A
	The open position of a Trading Member (Stock Broker) is arrived at by adding up his proprietary open position and clients' open positions, in the contracts which traded.	they have

Q 13,	An investor has ICICI Bank shares in his portfolio. He wants to protect against the downslide in this stock as he thinks the market may go down. What shows the stock as he thinks the stock as h	ould he do
	✓ CORRECT ANSWER	A
	Explanation:	10.0
	Buying a Put option means he has gone bearish. So any fall in ICICI Bank shares will result in profits in the Put option contract and this will negate the loss in cash mai	rket.
Q 14,	A spread that is designed to profit if the prices goes down is called  Hedge Spread Arbitrage Spread Bull Spread Bear Spread	
	✓ CORRECT ANSWER	A
	Explanation:	
	In a bear spread, the trader is bearish on the market and so he shorts a low strike high premium call option. The risk in a naked short call is that if prices rise, losses unlimited. So, to prevent his unlimited losses, he longs a high strike call and pays a lesser premium.	could be
Q 15,	Time value of an option is the difference between  its Strike price and premium its strike price and spot price its premium and spot price its premium and intrinsic value	
	✓ CORRECT ANSWER	<b>A</b>
	Explanation:	6.4.3
	Option premium consists of two components - intrinsic value plus the time value.  So the time value can be known by the difference in option premium and intrinsic value.	
Q 16.	In the F&O segment of NSE one can trade in the following derivative instruments except  □ index based futures □ individual stock options □ index based options □ individual warrant options ✓ CORRECT ANSWER	
	Explanation:	
	In the F&O segment of NSE, one can trade in	
	- Index based futures like Nifty or Bank Nifty,	
	- Individual stock options like Reliane Industries Call / Put options etc. - Index based options like Nifty Call / Put.	
	Options on Warrants are not traded on NSE F&O segment.	

Q 17.	What will be the payoff if a stock future was bought at Rs 100 and sold at Rs 87 ? The lot size is 1000 shares.  NIL + 13000 - 13000 - 8700	
	✓ CORRECT ANSWER	<b>A</b>
	Explanation:	
	There will be a negative pay off as there is loss.  Rs 100 - Rs 87 = Rs 13 x 1000 lot size = Loss of Rs 13000.	
Q 18,	The price at which the underlying asset can be bought or sold on exercise of an option is called  Spot Price Risk Premium Strike Price Option Premium	
	✓ CORRECT ANSWER	<b>A</b>
	Explanation:	
0.40	Strike price or Exercise price is the price per share for which the underlying security may be purchased or sold by the option holder.	
Q 19,	All types of investors should allot some portion of their portfolio to derivative products in order to increase the portfolio returns irrespective of their risk tole levels - State True or False?  True  False	rance
	✓ CORRECT ANSWER	<b>A</b>
	Explanation:	
	Derivatives are ideally used as a hedging product and not investment products. Also, as a stand alone investment, they can prove to be very risky. So investors whe want to take risks, senior citizens etc. should not trade / invest in derivative products.	io do not
Q 20,	Speculator accepts the risks in search of profits - State True or False?  False  True	
	✓ CORRECT ANSWER	A
	Explanation:  Should take the first was not a made and a second make the first was not accordingly have a self. There is wisk in such activities but the	
	Speculators try to predict the future movements in prices of stocks, commodities, currencies etc. and accordingly buy or sell. There is risk in such activities but the speculators take these risks in order to make profits.	

Q 21.	In India, the clearing and settlement of derivatives trades would be through  State Bank of India  Euroclear  SEBI approved Clearing Corporation / Clearing House	
	The Interbank Clearing House	
	✓ CORRECT ANSWER	A
	Explanation:	4.3.3
	Clearing Corporation/ Clearing House is responsible for clearing and settlement of all trades executed on the F&O Segment of the Exchange.	
	The clearing and settlement of derivatives trades would be through a SEBI approved clearing corporation /house. Clearing corporations/houses complying with the elig conditions as laid down by the L. C. Gupta committee have to apply to SEBI for grant of approval.	ibility
Q 22.	In a calendar spread transaction, the trader takes opposite position in two futures contract with  two different underlying assets and same delivery month two differently delivery months and two different underlying assets two differently delivery months and same underlying asset one stock and one index of same delivery months	
	✓ CORRECT ANSWER	A
	Explanation;	
	Calendar spread position is a combination of two positions in futures on the same underlying - long on one maturity contract and short on a different maturity contract. Finstance, a short position in near month contract coupled with a long position in far month contract is a calendar spread position.	or
Q 23,	Excess of premium in an option over the intrinsic value is known as the time value - State True or False ?  False  True	
	✓ CORRECT ANSWER	Δ
	Explanation:	245
	Option premium consists of two components - intrinsic value and time value. Option premium is the sum of intrinsic value and time value.	
	Time value is the difference between premium and intrinsic value. ATM and OTM options will have only time value because the intrinsic value of such options is zero.	
Q 24.	The simultaneous purchase and sale of two different tenors futures contracts in the same underlying is known as a  Limit order Short hedge Spread trade Long hedge	
	✓ CORRECT ANSWER	<b>A</b>
	Explanation: In case of a Spread Trade, two opposite positions (one long and one short) are taken either in two contracts with same maturity on different products or in two contracts different maturities on the same product.	

Q 21.

Q 25.	Delta is the change in option price given a one percentage point change in the risk-free interest rate - State True or False ?  True	
	✓ CORRECT ANSWER	<b>A</b>
	Explanation:	
	Rho is the change in option price given a one percentage point change in the interest rate.	
	Delta measures the sensitivity of the option value to a given small change in the price of the underlying asset.	
Q 26.	If the volatility of the underlying stock is decreasing, the premium of call option would  Increase Decrease will not change None of the above	
	✓ CORRECT ANSWER	<b>A</b>
	Explanation:	
	Lower the volatility lower the risk and so lower the premium.	
	The stocks which are highly volatile will have comparatively higher option premiums as there involves a lot of risk trading in such stocks.	
Q 27.	Investors who believe that the markets will fall are known as Bulls - State True or False?  True False	
	✓ CORRECT ANSWER	<b>A</b>
	Explanation:	
	Investors who believe that the markets will fall are known as Bears. Investors who believe that the markets will rise are known as Bulls.	
Q 28,	The mark to mark debits for stock options are done on a – fortnightly basis monthly basis daily basis weekly basis	
	✓ CORRECT ANSWER	A
	Explanation:	
	In the futures and options market, profits and losses are settled on day-to-day basis – called mark to market (MTM) settlement. The exchange collects these margins (MTM margins) from the loss making participants and pays to the gainers on day-to-day basis. Therefore all option positions - for both Index and Stocks are marked to market on a daily basis.	

	True False	
	✓ CORRECT ANSWER	A
	Explanation:	7+3
	The Clearing Corporation has powers to levy additional margins, special margins, define maximum exposure limits and disable brokers from trading.	
Q 30.	Losses incurred on derivative transactions on a 'recognized stock exchange' can be carried forward to subsequent assessment year and set off ago other non-speculative business income of the subsequent year.  5 8 12 15	jainst an
	✓ CORRECT ANSWER	A
	Explanation:	
	Loss incurred on derivatives transactions which are carried out in a recognized stock exchange can be carried forward for a period of 8 assessment years.	
Q 31,	A Forward Contract  can be cancelled but only after the expiry date can be cancelled if the counter party also agrees to it cannot be cancelled can be cancelled can be cancelled even without the consent of the counter party	
	✓ CORRECT ANSWER	<b>A</b>
	Explanation:	
	Forwards are negotiated between two parties and the terms and conditions of contracts are customized.  Any alteration in the terms of the contract or cancellation of the contract is possible if both parties agree to it.	
Q 32.	Can a Clearing Member give 'Fixed Deposits' as part of liquid assets to the Clearing Corporation?  Yes No	
	✓ CORRECT ANSWER	A
	Explanation:	4
	Clearing member is required to provide liquid assets which adequately cover various margins and liquid Net-worth requirements.	
	Liquid Assets can be in the form of Cash, Cash Equivalents (Government Securities, Fixed Deposits, Treasury Bills, Bank Guarantees, and Investment Grade Debt Se and Equity Securities.	curities)

If the clearing / trading member fails to pay the dues, the clearing corporation can disable the clearing / trading members from trading - State True or False?

Q 29,

Q 33.	The option premium is adjustable against the exercise price on settlement, if the option is exercised on maturity - State True or False?  True False	
	✓ CORRECT ANSWER	A
	Explanation:	
	The premium paid is adjusted against the exercise price on settlement, if the option is exercised on maturity.	
Q 34.	A Clearing Member has to deposit with the derivatives segment of the exchange or with the clearing corporation a minimum of  Rs. 50 lakhs Rs. 100 lakhs Rs. 150 lakhs Rs. 20 lakhs	
	✓ CORRECT ANSWER	A
	Explanation:	
	A Clearing Member has to deposit Rs. 50 lakhs with the clearing corporation which forms part of the security deposit of the Clearing Member.	
Q 35.	When a seller SHORT SELLS a stock, it means  He has more than a months time to deliver the stock which he sold  He owns the stock he is supposed to deliver  He has to deliver the stock within a short time  He does not own the stock he is supposed to deliver	
	✓ CORRECT ANSWER	Δ
	Explanation:	
	Selling Short means Seller does not own the stock he is supposed to deliver.	
	He has done a sale trade because he expects the price to fall and has to buy back the stock (either with a profit or loss) before the end of trading on that day.	
Q 36.	The strategy of buying a put option on a stock you are owning is known as  calendar spread aggressive put protective put Straddle	
	✓ CORRECT ANSWER	A
	Explanation:	
	Any investor in stocks always runs the risk of a fall in prices and thereby reduction of portfolio value.	
	By buying put options, the investor is effectively taking a bearish view on the market and if his view turns right, he will make profits on long put, which will be useful the MTM losses in the cash market portfolio.	to nega

Q 37.	State True or False - Scarcity of underlying commodity will generally cause a rise in its futures price.  True False	
	✓ CORRECT ANSWER	A
	Explanation:	
	Generally, a shortage / scarcity of any commodity will lead to a rise in the spot as well as futures prices. For eg. A drop in the manufacturing of oil by OPEC countries will lead to a rise in the international oil prices.	
Q 38,	At which price can a trader place a bid or offer for a scrip?  At a price which is within the daily circuit filter limits  At a price which the trader wishes  At a price negotiated between the exchange and the member  At a price which the trader deems fit	
	✓ CORRECT ANSWER	<b>A</b>
	Explanation:	
	The buy or sell price cannot be any price which the trader deems fit. It has to be within the daily circuit filter limits set by the exchange.	
Q 39,	A decrease in the interest rates will lead to  Increase the premium on the put option Decrease the premium on the put option Expires the put options immediately No effect on put options	
	✓ CORRECT ANSWER	Δ
	Explanation:	
	Low interest rates means low cost of capital and this will result in a decrease in the value of a call option and an increase in the value of a put option.	
Q 40.	What will be the value of one lot of ABC futures contract if the price is Rs. 3200 and the contract size is 150 ?  Rs.240000 Rs.320000 Rs.540000 Rs.480000	
	✓ CORRECT ANSWER	A
	Explanation:	
	Value of a futures contract is the price multiplied by the contract size.  In the above question :  3200 * 150 = Rs.480000	

Q 37.

Q 41,	A Professional Clearing member of derivatives segment should also be a member of the cash segment should also become a member of the cash segment within 2 years provides trading facility to its cients does not have any trading rights	
	✓ CORRECT ANSWER	Δ
	Explanation	
	Profess onal clearing member is not a Trading Member of the exchange and does not have trading rights	
Q 42,	When the price of a future contract increases, the margin account of the buyer of futures contract will be credited for the gain of the select of futures contract will be debited for the loss Both 1 and 2 None of the above	
	✓ CORRECT ANSWER	Δ
	Explanation	
	The buyer of futures will have a notional gain and so his margin account will be credited by the notional gain amount. The seller of futures will have a notional loss if the price rises and his margin account will be debited by the notional loss amount.	
Q 43	Theta is a measure of the sensitivity of an option price to changes in market volatility - State True or False?  If ale	
	✓ CORRECT ANSWER	Â
	Explanation	2+1
	Theta It is a measure of an option's sensitivity to time decay. Theta is the change in option price given a one-day decrease in time to expiration	
	Vega This is a measure of the sensitivity of an option price to changes in market volatility.	
Q 44	When the strike price increases, the premium on call option decreases - State True or False?  True False	
	✓ CORRECT ANSWER	A
	Explanation	
	The higher strike price would have a lower call option premium because the intrinsic value is low or nil	

Q 45	You sold one ABC stock futures contract at Rs 268 and the lot size is 1,500. What is your profit (+) or loss (-), if you purchase the contract back at Rs 274? +9000 +18000 9000 18000	
	✓ CORRECT ANSWER	A
	Explanation	243
	When you sell a stock future contract you make a profit if the share price falls or you make a loss if the price rises and you buy back the contract.	
	In this case ABC stock futures has risen by Rs. 6. (274 - 268). So there will be a loss	
	Rs 6 x 1500 (Lot size) = Loss of Rs 9000	
Q 46	The Intrinsic Value is zero for out-of-the money options but always positive for in-the-money options - State True or False?  False	
	✓ CORRECT ANSWER	A
	Explanation	
	In-the-money options have positive intrinsic value whereas at-the-money and out-of-the-money options have zero intrinsic value. The intrinsic value of an option can negative	never be
Q 47	A stock index like Nifty  s a basket of stocks can be easily man plated  Both 1 and 2  None of the above	
	✓ CORRECT ANSWER	A
	Explanation	
	Stock Index like Nifty and Sensex consists of a basket of stocks and so its very difficult—almost impossible to manipulate the index	
Q 48	When a call option on an index is exercised, the option holder will receive from the option writer, cash amount equal to excess of spot price (at the time of eover the strike price of the call option - State True or False?  If alse	exercise)
	✓ CORRECT ANSWER	<b>A</b>
	Explanation	
	A buyer of a Call Option in an index is bullish. On exercise, if the spot price of the index is over and above the strike price at which the buyer had bought the Careceive the difference between the spot price and strike price.	all, he will
	(The buyer had also paid the premium while buying the Call. So his actual profit will be the difference between spot and strike price less the premium paid)	

Q 49	There is higher flexibility in fixing forward contract specification as compared to Irue Fase	futures contract specifications - State True or False?	
	✓ CORRECT ANSWER		
	Explanation		<b>A</b>
	Futures are standardized contracts introduced by the exchanges. They have certain lii contract design and increased administrative costs on account of MTM settlement etc		ying set, lack of flexibility in
	Forward contracts are customised between two parties and there is complete flexibilit	y in designing the contract specifications as per mutual co	nsent.
Q 50,	What is Tick size?  Tick size is the size of the futures contract.  Tick size is the maximum permitted movement in the price of the contract.  Tick size is the minimum permitted movement in the price of the contract.  Tick size is the average of the highland low permitted prices.		
	✓ CORRECT ANSWER		<b>A</b>
	Explanation		
	Tick Size is the minimum move allowed in the price quotations.	EA

Q 62	Exposure levels of Clearing Members are correlated with the Liquid Assets maintained with the Clearing Corporation  Positively	
	Negat velv Notire ated	
	exponent alv	
	✓ CORRECT ANSWER	Δ
	Explanation	
	Exposure levels of Clearing Members are positively correlated with the Liquid Assets maintained with the Clearing Corporation	
	More the liquid assets deposited with the Clearing Corporation, higher will be the exposure levels available to the Clearing Member	
Q 63	Vega measures change in delta with respect to change in price of the underlying asset - State True or False?  True False	
	✓ CORRECT ANSWER	Δ
	Explanation	21
	Vega is a measure of the sensitivity of an option price to changes in market volatility. Gamma measures change in delta with respect to change in price of the underlying asset.	
Q 64	Afall in the price of Wipro stock increases the value of the Wipro call option - State True or False?  Ir 4e False	
	✓ CORRECT ANSWER	A
	Explanation	A
	In normal market, price of a call option rises with a rise in the underlying stock price and the premium falls if the price of the underlying stock falls.  So, if the price of Wipro falls, the value of Wipro call option will also fall	
Q 65	In general terms, if the number of participants in a market are more, the liquidity will be low - State True or False?  True Fase	
	✓ CORRECT ANSWER	$\triangle$
	Explanation Liquidity in the context of stock market means a market where large orders are executed without moving the prices	
	So if there are more the participants, higher should be the liquidity.	

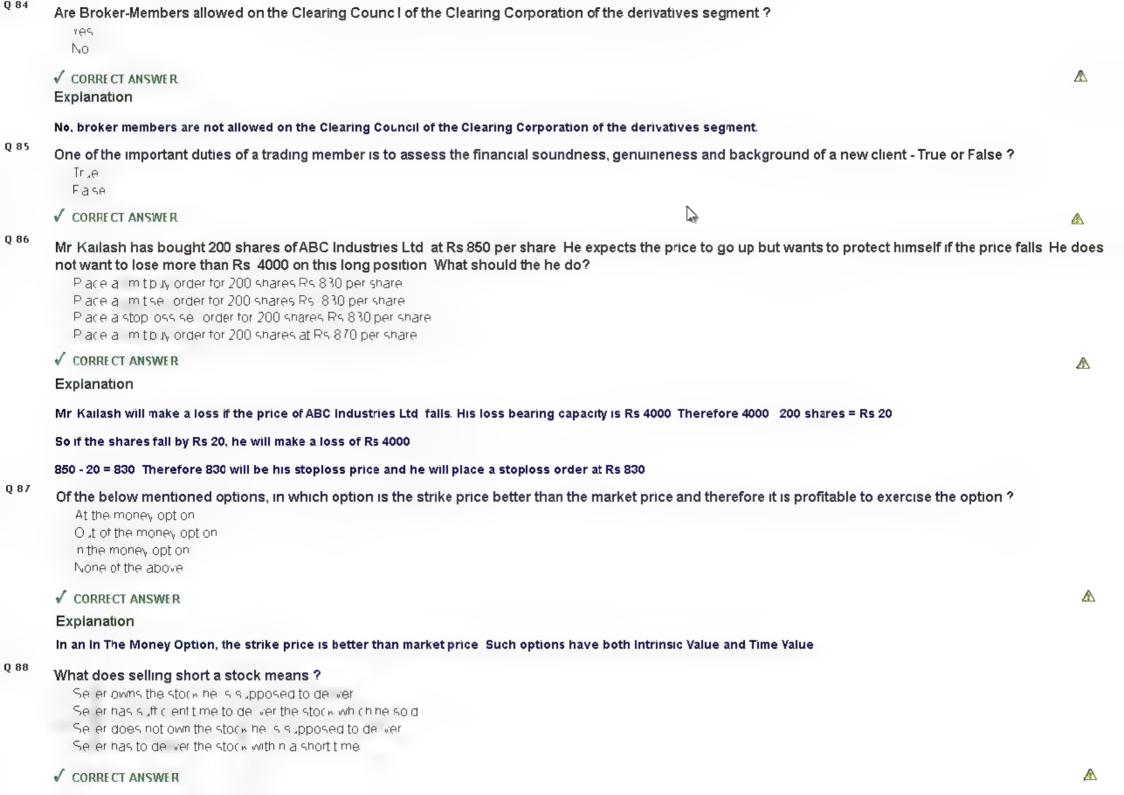

Q 66	The holder of a long position in a PUT option will gain if the price of the underlying asset		
	Decreases		
	Does not change		
	tithe option expires worthiess		
	✓ CORRECT ANSWER		⚠
	Explanation		
	The buyer of a Put Option is bearish. He believes that the price of the underlying will fall		
	When the price falls, the value of the put option rises So he will benefit only if the price decreases.		
Q 6 🖍	Which of the below statement(s) hold true for Futures Contract?		
	Figures Contracts are settled through clearing corporation of the exchange		
	Figures Contracts are standardized contracts		
	Fixtures Contracts are traded on an exchange		
	A of the above		
	✓ CORRECT ANSWER		A
	Explanation		
	Futures contract are standardised in terms of size of the contract, time to expiry etc. They are always traded on a corporation	recognised exchange and the settlement is through	a clearing
Q 68	Which one of these complaints against a trading member can an Exchange take up for redressal?		
	Complaints regarding and dealings between a clent and trading member		
	Complaints in respect of transactions which are a ready subject matter of Arbitrage proceedings		
	Claims regarding notional loss for the displated trade		
	Claims regarding unauthorized transaction in the client's account		
	✓ CORRECT ANSWER		Δ
	Explanation		
	Complaints against trading members on account of the following can be taken by an Exchange for redressal		
	<ul> <li>Non-receipt of funds securities</li> <li>Non-receipt of documents such as member client agreement, contract notes, settlement of accounts, order trades</li> </ul>	le log etc	
	- Non-Receipt of Funds Securities kept as margin		
	- Trades executed without adequate margins - Delay non – receipt of funds		
	- Squaring up of positions without consent	MA	
	- Unauthorized transaction in the account		
	- Excess Brokerage charged by Trading Member Sub-broker - Unauthorized transfer of funds from commodities account to other accounts etc		

Q 69,	The securities or money deposited by clients will be as per browers till es and regiliations can be used as per the decision of Clearing Corporation and the brower can be attached for meeting brower slobigation on his proprietarly account cannot be attached for meeting brower slobigation on his proprietarly account.	
	✓ CORRECT ANSWER	A
	Explanation	
	The securities or money deposited by clients cannot be attached for meeting broker's obligation on his proprietary account.	
	The broker has to maintain separate client bank account for segregation of client money.	
	Also brokers should keep margins collected from clients in a separate bank account.	
Q 70	Mr Sunil places a stop loss sell order on ABC stock with a trigger price of Rs 450. The current market price of ABC stock is Rs 470. The order will be releas execution	ed for
	As soon as the market price of ABC to Johes Rs. 470 As soon as the market price of ABC to Johes Rs. 450	
	As soon as the order is placed in the system  tis milar orders are available in the order book at Rs. 450	
	✓ CORRECT ANSWER	A
	Explanation	
	A stop-loss order gets activated when the trigger price is reached and enters the market as a market order or as a limit order	
	In the above question, the trigger price is Rs 450 So this order will get released in the system for execution as soon as the price of Rs 450 is reached

	✓ CORRECT ANSWER	$\triangle$
	Explanation	
	Index futures are always cash settled on maturity i.e. the difference between trade price and settlement price is received or paid	

Q 72	As per news, the Government can lose a vote of confidence and this can affect the stock markets pretty badly. If you are an active trader, what will take?	is the ideal step you
	Billy indexitatures	
	Se ndextutures	
	Double your portfolio holdings Buy Buse Chip shares	
	✓ CORRECT ANSWER	Δ
	Explanation	
	In case of a negative news like fall of a Government, the stock markets generally fall. Its difficult to judge which stocks will fall more. So, the best w futures as the index is bound to fall in response to a negative news and the active trader can profit from it.	ay is to short the index
Q 73	When ordinary cash dividends are declared, Call Option values will decrease - State True or False ?	
	Tr <sub>x</sub> e	
	Fase	
	✓ CORRECT ANSWER	<b>A</b>
	Explanation	
	Cash dividends issued by stocks have a impact on their option prices This is because the underlying stock price is expected to drop by the dividend date	end amount on the ex-
	In case of call options, the values get reduced discounted by as much as the dividend amount.	
	Put options get more expensive as the stock price will drop by the dividend amount after the ex-dividend date	
Q 74	When SEBI has approved the approves bye-laws of a derivative exchange, the exchange is free to introduce futures contracts on any number not require to go to SEBI every time - State True or False?	r of stocks and it does
	Tr <sub>a</sub> e Fase	
	✓ CORRECT ANSWER	
	Explanation	A
	Once SEBI has approved the approves bye-laws—rules etc. of a derivative exchange, the exchange is free to introduce futures contracts on a accordance to the approved rules and it does not have to go to SEBI every time for approval	ny number of Stocks in
Q 75	In the derivatives market, the mark to market margin is equal to the initial margin - State True or False?	
	Tr <sub>4</sub> e	
	Fase	
	✓ CORRECT ANSWER	<b>A</b>
	Explanation	
	Mark to Market's a process by which margins are adjusted on the basis of daily price changes in the markets for underlying assets. So this margin is as movements	per the daily price
	Initial margin is usually fixed depending on the price volatility. Higher the volatility, higher the initial margin	N

Q 76	On final settlement, the buyer/holder of the option will recognise the favourable difference received from the seller/writer as in the profit and loss accongone  Expense Loan  Amort zation	ount.
	✓ CORRECT ANSWER	A
	Explanation	
	On exercise of the option, the buyer holder will receive favourable difference, between the final settlement price as on the exercise expiry date and the strike price, we be recognised as INCOME	/hich wil
Q 77	Mr A sold a put option of strike Rs.300 on ABC stock for a premium of Rs.20 The lot size is 1000. On the expiry day, ABC stock closed at Rs. 250. What is you profit or loss?  30000 30000 70000	ır net
	✓ CORRECT ANSWER	A
	Explanation	
	Mr A sold a PU™ option, that means he has a bullish or neutral view on PQR stock	
	However, ABC stock has fallen by Rs 50 ( 300 - 250 )	
	Which means he has lost Rs 50	
	Since he has sold a PUT, he will receive the premium which is Rs 20	
	So his net loss will be Rs 50 (Loss) - Rs 20 (Premium Recd) = Rs 30	
	Total Loss = Rs 30 x 1000 (lot size) = Rs 30000	
Q 78	The exercise date and expiration date of an European option is  Always the same Always on the 28th of the exp ry month always different May be same	
	✓ CORRECT ANSWER	A
	Explanation	
	An European option can only be exercised on the expiry date day of the contract. So in an European option the exercise date and expiration date is always the same	
	An American option can be exercised on any day	

Q 79	In an 'Opening Buy Transaction' the effect will be that of creating or increasing  Arb trage position Cross position Long position Short position	
	✓ CORRECT ANSWER	A
	Explanation Opening a position means either buying or selling a contract, which increases client's open position (long or short)	
	Opening a <u>Buy transaction</u> means creating or adding LONG positions with a view that the price will increase	
Q 80	What advantage does the screen based trading has over floor trading?  There are no set up costs in screen based trading.  There is transparency in trade execution and execution price.  The technology needs are lower.  There is no need to route the order through an exchange.	
	✓ CORRECT ANSWER	Δ
	Explanation	
	Screen based (Trading thro' computers) trading is fully transparent.	
Q 82,	What does Value-at-risk measures?  value of a volatile portfolo  Risk level of at hand alportfolo  value of inquidishares portfolo  index PE value	
	✓ CORRECT ANSWER	A
	Explanation	
	Value at Risk calculates the expected maximum loss, which may be incurred by a portfolio over a given period of time and specified confidence level	
Q 83	A member has two clients Rohit and Mohit. Rohit has purchased 100 contracts and Mohit has sold 300 contracts in March Tata Steel futures series. What is to outstanding liability (open Position) of the member towards Clearing Corporation in number of contracts?  100 300 400 200	he
	✓ CORRECT ANSWER	A
	Explanation	
	For a member le Stock Broker, the liability will be the sum of all the contracts of all his clients. The contracts cannot be netted in between two clients. So in this case the contracts is 100 + 300 = 400 contracts.	e sum of

Q 89,	All the trades and open positions on a derivative exchange are guaranteed by the Clearing Corporation and it becomes a legal counter party.  True False		
	✓ CORRECT ANSWER		A
	Explanation:		
	Clearing Corporation or the Clearing House is responsible for clearing and settlement of all trades executed on the F&O Segment of the Exchange.		
	Clearing Corporation acts as a legal counterparty to all trades on this segment and also guarantees their financial settlement.		
	The Clearing and Settlement process comprises of three main activities, viz., Clearing, Settlement and Risk Management.	Est.	
Q 90,	Mark-to-Market margins are collected on a basis.  monthly weekly bi weekly ie Mondays and Thursdays daily		
	✓ CORRECT ANSWER  Explanation:		<b>A</b>
	In the futures market, profits and losses are settled on day-to-day basis — called mark to market (MTM) settlement.		
	The exchange collects these margins (MTM margins) from the loss making participants and pays to the gainers on day-to-day basis.		
Q 91.	STT means  Stock Trading Tax  Stock Transaction Tax  Securities Transaction Tax  Securities Trading Tax		
	✓ CORRECT ANSWER		A
	Explanation:		
	Securities Transaction Tax (STT) is payable by the Trading Members / Brokers on the stock market transactions and this is collected from their clients.		

Q 92.	Of the below options, when will the April index future contract be intro On the 1st trading day after last Thursday in March On the 1st trading day after last Friday in March On the 1st trading day after last Thursday in January On the 1st trading day after last Friday in January	oduced on NSE ?	
	✓ CORRECT ANSWER Explanation:		A
	There are always 3 contracts running. So for eg. we will have Jan-Feb-Mar	contracts trading in January,	
	When January contracts expire on last Thursday of January, on Friday the	April contracts will be introduced and so we will have Feb-Mar-April contracts.	
Q 93.	Main objectives of Trade Guarantee Fund (TGF) are:  To protect the interest of the investors in securities.  To inculcate confidence in the minds of market participants.  To guarantee settlement of bonafide transactions of the members of the All of the above	exchange.	
	✓ CORRECT ANSWER		$\triangle$

Q 95.	In India, the derivatives product can be traded by  Brokers of NSE / BSE SEBI registered brokers SEBI registered brokers for trading in derivatives All of the above		
	✓ CORRECT ANSWER		<b>A</b>
	Explanation:		
	Special permission has to be taken from SEBI for trading in derivatives.		

Q 92.

Q 96.	Mr. Banerjee sells a put option of a higher strike price and buys a put option of a lower strike price, both on the same share and same expiration. This strategy called  Bearish Spread Bullish Spread Calendar Spread	is
	Straddle	
	✓ CORRECT ANSWER	Δ
	Explanation:	
	Bullish Spread using Puts - the call on the market is bullish, hence, the trader would like to short a put option. If prices go up, trader would end up with the premium or puts.	n sold
	However, in case prices go down, the trader would be facing risk of unlimited losses. In order to put a floor to his downside, he may buy a put option with a lower strike. this would reduce his overall upfront premium, benefit would be the embedded insurance against unlimited potential loss on short put. This is a net premium receipt strate	
Q 97.	Generally the Future prices converge to Spot prices on expiry day - True or False?	
	False	
	True	
	✓ CORRECT ANSWER	
	Explanation:	
	Future Price essentially means Spot Price + Cost of Carry ie. interest cost etc.	
	On the expiry day ie, the last day, the cost of interest etc. will be nil, so the Future Price and Spot price should ideally be same.
